Victoria Vesna: NANO Exhibition
An exhibition making nanoscience visible, tangible, and experiential.

December 14, 2003 - September 6, 2004
Los Angeles County Museum of Art, 5905 Wilshire Boulevard

Department of Design|Media Arts
UCLA
vesna@arts.ucla.edu

NANO, a ten month-long exhibition at the Los Angeles County Museum of Art's 10,000 square-foot Boone Children's Gallery, will immerse over 100,000 visitors of all ages in a visceral, media arts experience of the convergence of computing, nanoscience and molecular biology. Produced by LACMA Lab with installations developed by a group of media artists and nano-scientists led by media artist Victoria Vesna and nano-scientist Jim Gimzewski; text interventions by a group of writers led by Katherine Hayles; with innovative architects Sharon Johnston and Mark Lee designing the space, NANO is a true trans-disciplinary collaboration.

The NANO exhibition is on view December 14, 2003 - September 6, 2004 at the Los Angeles County Museum of Art, 5905 Wilshire Boulevard.
